

Cleaner air by using Aircode™

“The fitness industry has been growing rapidly the last few years and has become more and more competitive, this is something that we embrace and it also means that we have higher demands from our clients.”

To run a fitness center is more than deliver training functions, machines, dressing rooms etc. Today it's about handing a total wellbeing solution that enhances the quality of life.

One year ago we at World Class decided to work even harder on the environment/ health aspect to be at the forefront, ahead of our competition. We wanted to achieve a visual result in terms of a fresher and cleaner climate for our customer.

Aircode™ RX-100 Installed on the roof at World Class Masthugget

Aircode™ were introduced to us by mouth to mouth. We installed the product in parts of our facility where we felt that most would benefit and where the effect of odors, sweat and dust were an issue.

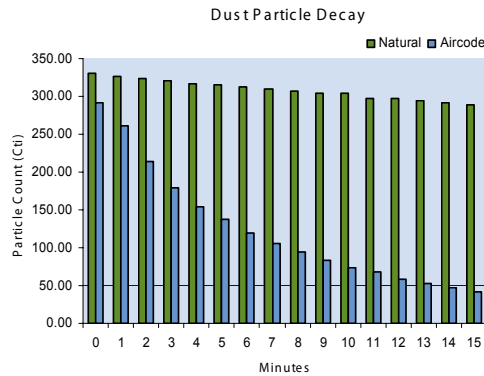

Shortly after a unique result appeared, the odors were completely gone and the air felt fresh, even during workouts, and the amount of dust were significantly reduced. Something we noticed in our own cleaning procedures.

The fact that Aircode™ also reduces fungi, mold and bacteria's has also added one dimension in our sales pitch for new customers. That's why we use this in our promotion and have it visual in our facility. We have received lots of encouragements from our customers and some of them are now using the technology within their homes.

Finally we want to say thank you to Matseco AB, for the professional acting during the whole process. From explaining/selling, installation and handling the aftermarket, they have become a tool for us to have happier customers and a healthier environment. The result of all this is that we are planning to install Aircode™ throughout our premises.

I want to give my warmest recommendations.

Robert Adolfsson
President World Class Masthugget

Environmental goals

- Particle reduction
- Solvent reduction
- Odour elimination
- Bacteria elimination
- Fresher environment
- Healthier environment

Aircode™ RX-100

The unit eliminates odors, bacteria, airborne microbes, gases, mould and fungus, greatly reducing the numbers of airborne particles.

Aircode™ IDAC-500

The unit creates a clean environment in both industrial and commercial office buildings.

The unit can be configured to eliminate a broad range of VOCs (Volatile Organic Compounds), odors, bacteria, airborne microbes, gases, mould and fungus spores.
