

Icomia's Preferred Supplier program

Icomia presents:

Matseco AB with headquarter in Sweden, is a sustainable international operating and engineering company/firm, providing services and innovative solutions for Air, Water and Waste. Products and program of Matseco AB are available and focused on Air/Water ionization and Waste Treatment which are Biomass to Energy Solutions

The main target group of Matseco AB consists of large group of enterprise customers that seek sustainable solutions and environmental improvements as well as value-added sales and distribution companies that service different application needs within their circle of customers. Some examples are:

- Ship & Yacht building (internal and external use)
- Marinas
- Auto body shops
- Schools, day-care, hospitals, nursing homes
- Office buildings
- Industries
- Print works/copy shops
- Textile, paper and plastics production
- Installations for water purification and waste processing, including those from ballast and bilge water as well waste treatment of Marinas and recreational facilities.
- Biomass to Energy Solutions (green fuel, free from Sulfur with same parameters like normal diesel fuel).
- Health & fitness clubs
- Hotels

Innovation

Matseco AB are specially marketing to the yachting industry a special Biomass to Energy Solutions from the company Green Sprout. Where they have a Green diesel without Sulfur that will reduce NOx emission and save engines from wear.

We are extremely pleased to be working alongside such a connected and high end group as ICOMIA. Since 2008 we have been delivering large scale customized installation for some of the most prestigious clients within ICOMIA's sector and after loads of testing and measurements they have invited us for an even closer relationship.

We are very enthusiastic about this and are looking forward to welcoming more shipbuilders and marinas within our Companies.

Mats Nilsson, Matseco AB
