

For years, countless automotive companies in the car painting and auto dealership industry have wanted to improve their indoor environments for employees and customers with fresh, cleaner air throughout their facilities. Now they can!

Aircode™ has made it possible through its medical-grade, ionization technology, which creates an environment that will also contribute to operational cost savings and profitability.

Aircode™ products go beyond eliminating odors, bacteria, airborne microbes, dust, gases, mold, fungus, and spores throughout dealership showrooms, offices, reception areas, and maintenance facilities thereby reducing the cost of health issues.

Aircode, easy to install and to retrofit in any given environment or ventilation system.

Aircode™ products:

- Improve the appearance of your showroom
- Reduce the annual cost of supplying cooler air throughout your facilities to both employees and prospective buyers
- Allow for smoother and clearer paint applications
- Reduce the cost of operating air circulation systems
- Improve working conditions in service areas
- Help meet environmental air quality standards
- Treat emissions from hazardous air pollutants
- Remove odors from your pre owned vehicle fleet without chemicals, spray scents or air fresheners

Aircode™ CX-100

The unit eliminates odours, bacteria, airborne microbes, gases, mould and fungal spores.

The CX-100 creates a fresher climate in workshops and maintenance areas, paint booths, showrooms, reception, offices and waiting areas.

The unit eliminates odours, bacteria, airborne microbes, gases, mould and fungal spores.

Aircode™ ID AC-550

The Aircode ID 500 is an ionisation unit for installation in ventilation ducts. The unit creates a clean indoor climate in industrial facilities as well as in commercial buildings and public premises.

The unit eliminates odours, bacteria, airborne microbes, gases, mould and fungal spores.

Aircode™ CX-600

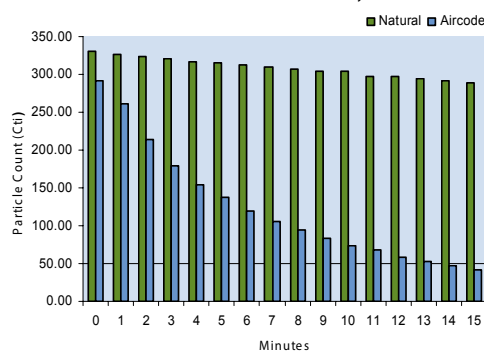

An ionisation unit that is used to sanitise odours, mould, moisture and smoke-damaged areas.

With a CX-600 it is also possible to deal with larger areas that have a higher odour or particle content.

This is an easy to install unit that provides quick and thorough sanitation.

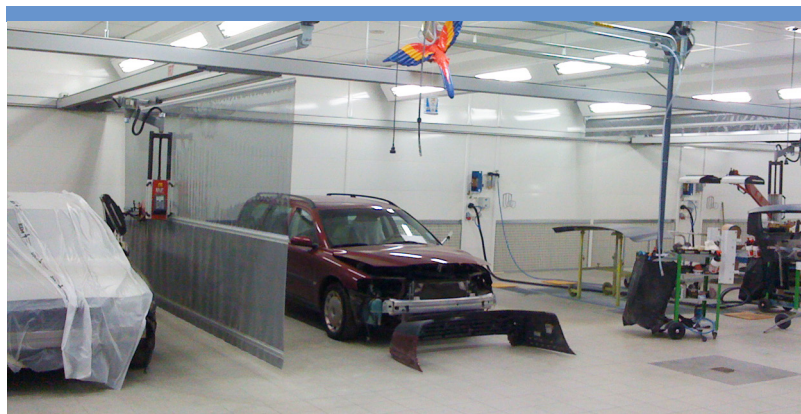

Dust Particle Decay

Environmental goals

- Particle reduction
- Solvent reduction
- Odour elimination
- Bacteria elimination
- Fresher environment
- Healthier environment
