

Aircode™ Technology is Launched with Professional Soccer Teams

Professional soccer teams have now completed performance testing with Aircode™. The tests have been done throughout teams training facilities and arena locker rooms with outstanding results.

Aircode™ creates an environmentally friendly and energy efficient way a cleaner indoor climate free from odor, bacteria, mold spores, fungus and particles.

The working environment for employees, visitors and especially members of the team has been improved with healthier, cleaner air throughout the buildings.

There are several benefits to using Aircode™, for example, the risk of bacteria and viruses building up and spreading decreases significantly, players recover faster from workouts, perform better and stay healthier.

Aircode™ is cost-effective solution which cleans the air without any chemicals. Aircode™ products can be stand alone or installed directly into ventilation systems. They are easy to use and install, requires only 15-35W and only one service occasion per year.

References

"There is a noticeable difference in air quality throughout our facility and our home arena locker room, feels fresher and cleaner"

Oscar Jonsson Goal keeper DIF

"The aircode system has eliminated the smells in our dressing room and gym, which makes it more pleasant to work out in."

Per Karlsson Captain AIK

"With Aircode installed we are convinced that the spread of viruses and bacterias decreased considerably, which makes the team healthier and stronger. I highly recommend this product."

Aircode™ CX-200

A stand alone stainless steel device that can easily be installed on the ceiling or on the wall with four screws and a plug. The CX-200 creates a fresher climate in closed areas.

Aircode™ CX-600

With a CX-600 it is also possible to deal with larger areas that have a higher odor or particle content. This is an easy to install unit that provides quick and thorough sanitation.

Aircode™ IDAC-500

The Aircode ID-500 is an ionization unit for installation in ventilation ducts. The unit creates a clean indoor climate in any facility as well as in commercial buildings and public premises.

All units eliminate odors, bacteria, airborne microbes, dust, gases, mold and fungal spores.
